

GRAS 26CF

1/2" CCP Preamplifier with BNC Connector, Gain and Filters

Freq range: 2.5 Hz - 200 kHz

Noise: 1.8 μ V Gain: -0.25 / +20 dB

Special feature: 0/20 dB gain, A-weighting
and HP filters

The GRAS 1/2-inch Preamplifier GRAS 26CF is a general purpose preamplifier optimized for use with prepolarized condenser microphones. It is a small, robust unit and uses a GRAS CCP power supply, e.g. GRAS 12AL. It has low inherent noise level, a large dynamic range and a frequency response from 2.5 Hz to 100 kHz.

Gain and filter switch settings

There are two flush-mounted switches for selecting various combinations of gain and filtering, i.e.:

Gain switch settings:

- 0 dB - for normal microphone signals.
- +20 dB - for boosting weak microphone signals.

Filter switch settings:

- A-Weighting - as required in standard measurements.
- Linear - to let the microphone signal pass unfiltered.
- High-pass - to cut off unwanted low frequencies.

Its small ceramic thick-film substrate has a very high input impedance, and is shielded by a guard ring to minimise the influence of stray capacitance and microphonic interference.

The GRAS 26CF can be used with all GRAS prepolarized microphones, namely:

- 1/2-inch microphones: GRAS 40AE, 40AD and 40AQ
- 1/4-inch microphones: GRAS 40BE and 40BD, using the optional 1/2-inch to 1/4-inch adaptor RA0019

It has an integrated BNC output connector.

The casing is made of stainless steel for maximum strength and durability.

CCP stands for "Constant Current Power" and describes GRAS power supplies that maintain a constant level of current for driving IEPE transducers like this preamplifier which can be used with prepolarized microphone cartridges such as GRAS 40AD, 40AE, 40AO and 40AQ.
