

100%

A realistic, tan-colored anatomical model of a human ear, shown from a side profile. The ear is mounted on a square, light-colored base. The base has the text "G.R.A.S." printed in the upper right corner and "Do not pull" printed vertically on the right side. The ear model is highly detailed, showing the outer ear (pinna) and the ear canal. The entire setup is placed on a white surface against a white background.

## About GRAS Sound & Vibration

GRAS is a worldwide leader in the sound and vibration industry. We develop and manufacture state-of-the-art measurement microphones and related equipment for industries where acoustic measuring accuracy and repeatability are of the utmost importance. This includes applications and solutions for customers within the fields of aerospace, automotive, audiology, consumer electronics and other highly demanding industries. GRAS microphones are designed to live up to the high quality, durability and accuracy that our customers have come to expect, trust and require.

GRAS Sound & Vibration is represented through subsidiaries and distributors in more than 40 countries and is part of Axiometrix Solutions, a leading test solutions provider comprised of globally recognized measurement brands. Read more at [www.grasacoustics.com](http://www.grasacoustics.com)
